Subject: Letter of Referral IHS Studios

To whom it May Concern:

I would highly recommend Mr. Dennis Robert's and the very professional and talented staff of IHS studios. They worked with us to develop and install five beautiful windows for our newly constructed Memorial Chapel at ground zero in the Pentagon.

Mr. Robert's worked within the parameters of the Federal government to design windows that speak to all faith groups represented in our great nation and faithfully remember those who gave their lives here on September 11th 2001.

The staff worked tirelessly to meet our taxing schedules and security requirements. They also worked with our grief counseling staff to insure that members of the work force where able to help construct the windows. This additional ministry on their part was significant part of our healing process. Mr. Roberts and his staff are sensitive people of faith who have the ability to allow their art to speak to and heal a very hurting community.

If you would wish to talk with me personally about their work with us do not hesitate to call me personally at the number found in my signature block.

Sincerely,

A handwritten signature in black ink, appearing to read "Ralph G. Benson", with a long horizontal flourish extending to the right.
